Own the Bone at Western Reserve Hospital

Western Reserve Hospital is proud to participate in the American Orthopaedic Association's Own The Bone™ Program, which enables healthcare providers to better identify, evaluate and treat patients that suffer from an osteoporosis or low bone density-related fragility fracture. Own the Bone brings focus to the severe health implications of fragility fractures and the multi-faceted approach our hospital can employ to ensure our patients receive the most comprehensive care.

For more information call (330) 971-7258

Western Reserve Hospital
(330) 971-7000
1900 23rd St
Cuyahoga Falls, Ohio, 44223

There is no additional cost to you for participating in the Own the Bone® program, but for patients who elect to undergo a bone density "DEXA Scan," there is a fee that will be determined based on your insurance.
